  A) most cheap   (B) cheaper (C) cheapest   (D) cheap

20. Give them there books.
  (A) these   (B) this (C) their   (D) those

READING

Direction (Q. No. 21 and 26): Read the passage and answer the following questions.

Spit keeps our mouths moist and softens our food when we chew. Without spit in our mouths, we would have a hard time talking. We would find it even harder to swallow. But for some animals, spit works better after it has left the mouth. Some animals are experts at surviving because they are expert spatters.

Llamas are animals often found in petting zoos and farms. These animals seem to like their personal space. A llama that feels threatened or annoyed will spit slimy gobs at you to get you to leave it alone. Sometimes llamas even spit on each other to steal food! This trick usually works, because llama spit includes food from the llama's stomach, and it can be quite smelly. When a llama spits on another animal, the animal usually loses its appetite and walks away, leaving its food behind. (Source: SuperTeachers)

21. Spit keeps our mouth moist and_____.
